Varn® Aqua Conditioner

Hardening agent for fully desalinated water

Speciality product for all printing applications and press types

Product Features

- Varn® Aqua Conditioner is used in fully desalinated water to adjust the hardness to approximately 9°d, which is considered to be optimum water conditions for lithographic printing.
- Varn® Aqua Conditioner does not contain ingredients which will disturb the printing process.
- Varn® Aqua Conditioner stabilises the incoming water to press and therefore enables accurate and constant pH & conductivity values of the mixed dampening solution to be maintained.

Advantages of Varn® Aqua Conditioner

- Stabilises the water supply.
- Compatible with all fountain solutions.

The aim of our technical documents is to inform our customers about general values. However, the transferability of general values known from experience and laboratory results to concrete practical applications depends on a number of factors which are beyond our control. We therefore ask for your understanding that this advice document cannot be used as the basis for claims in law. Furthermore, the correct application for each product has to be checked carefully for suitability.
